1 Ideas

1. Statics app

   - Images for gear ratios? (bring in different gears)
   - Make it for "real" engineers?

2. Calorie/carbs/cholestoral counter

3. ebook (epub) reader

4. Trip cost application (mpg, gps location, average price of gas in area).
   Account for time. Maybe let user set certain

   - https://developers.google.com/maps/documentation/android/
   - http://www.fueleconomy.gov/mpg/MPG.do?action=browseList
   - Have user input mass transport cost data
   - https://developer.android.com/reference/android/location/LocationManager.html
   - Parking (availability, cost, etc.) Destination dependent. Have user
     enter their own info?
   - Tolls

5. Games

   - Minecraft clone
   - Zelda clone (Something like this)
   - Chess
   - Checkers
   - Space shooter (aliens?) *Maybe* 3d?

2 Targets

Whatever sofia supports?
